SÉMINAIRE DE RECHERCHE SUR LA VILLE Just Sustainabilities in Policy, Planning and Practice

Présenté par Julian Agyeman, Ph.D., FRSA, FRGS, Professor of Urban and Environmental Policy and Planning at Tufts University, Visiting Professor at McGill/McConnell Foundation Cities for People Fellow.

"He is the originator of the increasingly influential concept of just sustainabilities, the intentional integration of social justice and sustainability defined as: the need to ensure a better quality of life for all, now, and into the future, in a just and equitable manner, whilst living within the limits of supporting ecosystems."

In his talk Julian Agyeman will outline the concept of 'just sustainabilities,' arguing for the urgency of integrating social justice with sustainability objectives, to create a more just, rounded, and equity-focused definition of sustainability and sustainable development. Based on his research, Julian will offer examples of just sustainabilities in policy, planning, and practice focusing on ideas of 'Complete Streets' and urban design for all; planning for intercultural cities; urban agriculture and food justice; and Sharing Cities as a more relational concept than the largely transactional notion of the sharing economy.

MERCREDI 30 MAI 2018

De 12h45 à 13h45

ESG UQAM, Local R-4880

Pavillon des sciences de la gestion UQAM

315, rue Sainte-Catherine Est
